Hi! I'm

ELLESA SABASAJE

front-end developer   *user experience* designer

With over 6 years of experience, I live to create engaging experiences, craft pixel perfect designs and making products people love.

To fuel my passion for design, my goal is to ensure that I'm in an environment that allows me to create the best experiences and deliver the most value to as many people as possible.

EXPERIENCE   Where I've learned and grown

Nimbyx

UX ENGINEER & FRONT-END DEVELOPER   Dec 2015 - Present

Working on the company's flagship products, Evident Labs and Nimbyx ecosystem, I took charge of designing and developing the style guide and CSS frameworks. To save hours of development time, I worked closely with clients to rapidly iterate on UI solutions. I handled research, wireframing, prototyping, high-fidelity mockups and user flows.

Kite Systems

LEAD FRONT-END DEVELOPER   Sep 2014 - Oct 2015

As lead, I managed the overall front-end strategy for the re-design of NAVGlobal. Working with an international team of developers, I broke new ground by styling for a crossover between .Net and ASP, dealing with the highest levels of security and large amounts of financial data.

John Scott School of Voice

UI DESIGNER & DEVELOPER   May 2011 - Nov 2013

To help the school get a foot in the e-Learning door, I handled just about everything in the UX and front-end spectrum: user flows, wireframes, prototypes, visual design and microcopy. Leveraging hands-on user research, I broke new ground by devising an automated voice analysis program.

SugarHabits

UI DESIGNER   Feb 2010- May 2011

As the primary designer, I participated in all key phases of app design and development, but focusing on UX, wireframe design and user journeys. With valuable user research, I devised a gamification strategy that users loved.

EXPERTISE   What I'm good at

Tech Stack	Methods	Design Process	Tools & Workflow
HTML5	B.E.M.	Design Strategy	Sketch 3
CSS3	SMACSS	User stories	Omnigraffle
Javascript	Atomic Design	Personas	Photoshop
jQuery	Lean UX	Research & validation	Illustrator
Sass	Scrum	Journey maps	InVision
Bootstrap	Responsive Design	Card sorting	Grunt
Angular*		Scenario maps	npm
		Wireframes	Bower
		Mockups	Git
		Prototypes	Codekit

*Working knowledge
